01.

The guidelines describe the visual and verbal elements that represent Framen's corporate identity.

What do we offer?

FRAMEN as a platform, serves two interfaces.

Screen Manager: screen vendors manage screens remotely, choose content they would like to showcase, and create an additional revenue stream by allowing brands to book their screens.

Ads Manager: brands advertise their ad campaigns on digital-out-of-home screens to captivate their target audience and choose the right locations and venue types to suit their needs.

Why do we exist?

To offer a modern, flexible, affordable and easy way to advertise on out-of-home screens all over the world.

Where can you find us?

Our offices are located in both Berlin & London

Who is our audience?

All sized businesses, advertisers, marketers, agencies, locations/vendors with screens.

Screens network:

45,000+ screens in

15+ countries in

4000+ cities with

12,000+ locations

What is our ultimate goal?

To become the world-leading screen advertiser and manager platform, and dominate the digital-out-of-home media marketplace.

Tone of voice

All brands need a robust tone of voice and style guide to help them stand out from the crowd. You should use this every day as a guide for making your writing better, and demonstrating our principals to the world.

How do we define our tone?

Engaged
Clear
Bold

Tone of voice

We want to create useful, short, sharp content for our audience. We don't want to isolate people with our writing by being over-complicated, over-formal or over-academic.

It's important to be engaged to show our passion and enthusiasm for our industry and clients.

It's essential to be clear so we're easily understood.

It's crucial to be bold in our tone so we convey our message in a confident way.

Copywriting Style Guidelines

Should you use an em dash or en dash? Is it Framen or FRAMEN? Do we use du or sie?
What is title case and sentence case?

Get all the answers relating grammar, punctuation, language, spelling, articulation and formation in our [Copy Style Guide](#).

Our Copy Style Guide has been designed to ensure accuracy and consistency across all our written communications.

Copy Library

If you are in need of a standardised, cohesive and pre-created section of text then you'll want to stop by our Copy Library. Here you'll find boilerplate text, pre-defined paragraphs about FRAMEN and it's tools that can be a quick copy-paste solution when needed.

Style Guidelines

Brand Persona

Intertwined closely with our philosophy is our brand persona. FRAMEN's persona is made up of a unique set of personality traits, values, tones and attitudes that represent and define who we are.

Incorrect Logo
Applications**

Logo introduction

The FRAMEN symbol is the core visual representation of the brand. It represents our main media - screens and connection between them forming a link. FRAMEN is all about connecting people, places, and products through screens. Our logotype is a lockup of our name and symbol. This is the one we primarily use in any communication.

1 THE FULL LOGO TITLE

2 LOGO DARK VERSION

2) The Logo Dark Version
will be used when the background color is light colored.

3 LOGO LIGHT VERSION

3) The Logo Light Version
will be used when the background color is dark colored.

RECOMMENDED FORMATS: .eps | .ai | .png | .jpg | .tiff

Logo construction & clearspace

LOGO CONSTRUCTION & CLEARSPACE

It is important to keep corporate marks clear of any other graphic elements. To regulate this, an exclusion zone has been established around the corporate mark. This exclusion zone indicates the closest any other graphic element or message can be positioned in relation to the mark of the the symbol itself and our company name – they have a fixed relationship that should never be changed in any way.

LOGO DIMENSIONS

CLEARSPACE

Full Logo

Definition

Whenever you use the logo, it should be surrounded with clear space to ensure its visibility and impact. No graphic elements of any kind should invade this zone.

Computation

To work out the clearspace take the height of the logo and divide it in half. (Clearspace = Height / 2).

Application on a background

White Logo Version A

Black Logo Version B

Colored Logo Version C

White Logo Version D

Logo can be used with gradient symbol or in one color with the text part. Use gradient symbol on white background only. Use appropriate text color for dark or light backgrounds to maximize contrast.

MINIMUM LOGO SIZES

Minimum Size: 144px/1.5in

Use with photography

Use flat dark or white logo with photography. Place logo so that it is clearly visible, has enough clear space and contrast. Try to generally avoid placing logo over too busy images.

Misuse

⊗ DON'T DISTORT

⊗ DON'T USE OTHER COLORS

⊗ DON'T BRAKE THE LOCKUP

⊗ DON'T USE EFFECTS

⊗ DON'T PLACE WITHOUT CLEAR SPACE

⊗ DON'T ROTATE

⊗ DON'T CHANGE THE FONT

⊗ DON'T USE OVER BUSY IMAGES

Typography and hierarchy

Use clear font hierarchy with enough contrast between headers, subheaders, body etc.
Use Raleway for Headers and Display purposes. Use Inter for Body and all other purpose.

Applications
Backgrounds**

Photography

Image layout principles

Explanation:

- Footage must be clear and bright.
- Dark shots must be avoided unless specifically asked for.
- The FRAMEN TV screens should be visible and uncropped.
- Make sure the screen is not partially cropped.
- Actors looking on the phone: to be avoided
- Actors interacting with the screen + phone like scanning a QR code

Photography misuse

Misuse

Make sure Ad's are always visible

Do not shoot in dark environments

Always make sure screens are visible

Do not use overcrowded photography

Abstract backgrounds

Website Application Iconography and Examples

BUILDING WEB

There is a library of components and layouts available in Figma for overview and as a Contentful prefab. Try sticking with these components while crafting promotional pages. Contact Website team if you need a custom layout crafted for a more specific goal.

WEB ICONS

Use Google Material Icons if you need to add Iconography. It provides wide variety of weights and variations to fit your needs and provides easy instruments to find what you need.

Stick to the icons with No fill

300 Weight

0 Grade

Set optical size according to target size:

24px for small icons, 48px for big ones

Export in SVG unless used in software
that does not support SVG
